1.1. Issuance using correct application number

1-2. Instance using incorrect scale application numbers

1.3. Actual application

[illegible]

【overview】

Verify that the correct application number is used and the product key is issued.

Total items	OK	NG	on hold	Not tested
53	10	0	0	0

[Initial settings/test conditions]

1. Access the Web portal (login page) from the specified browser.
2. Log in with the appropriate user for the option you want to check.

[Test procedure/verification contents]

1. On the product key insurance screen, enter "MPF model" (display name/delivery email address/MPF serial number).
2. Select the MPF option ID and enter the associated application number. [OK]
3. Click the "Next" button and confirm the product key insurance screen (click check).
4. Verify that the check result shows "OK" and click the "Publish" button.
5. Check that the product key is displayed on the printing screen.
6. Issue a product key using a separate PK tool and check the contents.
7. When the product key is issued, check the contents of the email sent to your email address. [OK]

Total Items	OK	NG	on hold	Not tested
7	7	0	0	0

[initial settings/test conditions]

- Please check the "Environment Settings" tab for common settings such as the login page.

- The product key used in "1-1. Issuance using normal application number" on the "Product key issue/application confirmation" tab

Use "MFP model ID/MFP serial number/MFP option ID/Application number"

1. Access the Admin Portal
2. Log in as the Admin user

(Test procedure/verification contents)

1. Click "Product Key" on the top menu.
2. On the display/delete screen, enter the "MFP model ID/MFP serial number/MFP option ID/application number."
3. Click the "Search" button.
4. Click the "Delete" button on the product key registration information screen.

3-1. Mobile-specific screen generation and application to actual devices

【overview】

Verify that the issued product key can be applied to the actual device.

(Number of Items)

Total Items	OK	NG	on hold	Not tested
5	5	0	0	0

[Initial settings/test conditions]

1. Please check the "Environment Settings" tab for common settings such as the login page.
2. Log in with administrator privileges (admin) from the MFP operation panel.
3. Select "System Settings", "Initial Installation Settings", "Enter Product Key" ("System Settings", "Common Settings" - "Enter Product Key").
4. On the "Enter Product Key" screen, the URL of the mobile device portal site of the product key server and a QR code containing the product name and serial number of the MFP are displayed.
5. Scan the QR code with your mobile device's standard camera and tap the displayed URL.
6. Transition to the portal site for mobile devices.
7. Tap the hidden keys in the order of left/right/left to transition to the login screen.

[Test procedure/verification contents]

1. "MFP serial number/MFP model ID" is automatically entered on the application number input screen.
2. Select the MFP option ID and enter the associated application number.
3. Click "Generate" and confirm that "Successful" is displayed on the product key issuing screen.
4. Check that the product key is displayed on the printing screen.
5. Enter the issued product key into the MFP.
6. Click the "Register" button.

*Please enter the "Application number/unlock code/issue key" you used or issued in the confirmation details field

*For the red "x" in the MFP option (2), please enter the number shown
